VARIANCE / FIELD CHANGE NOTICE		E- 2690	21110 V/F 24400-PSP-0001-1
WBS NO.: ²¹¹¹⁰ 24400-PSP-0001, Rev. 0		Page <u>1</u> of <u>1</u>	
PROJECT TITLE: PSP for Area 8, Phase III-South Precertification Real-Time Scan		Date <u>9/29/99</u>	
VARIANCE / FIELD CHANGE NOTICE (Include justification): <u>Field Change Notice:</u> The reading identification system was modified for one RSS run that was collected along the inside of the FEMP property fence. This run will be identified as: <i>A8P3S-P1-Fence-batch #</i> . <u>Justification:</u> The mobile-Nal detectors could not be used to scan the strip of soil between Paddys Run Road and the FEMP property fence due to safety concerns (steep terrain and traffic). Instead, one run was collected immediately inside the fence in order to provide maximum coverage (approximately four feet) of soil immediately beyond the fence. The ID change was necessary since this run crossed the boundaries of numerous surveyed acres, so keeping the readings tied to the acre numbers would have been impractical.			
REQUESTED BY: <u>Joan White</u>		Date: <u>9/24/99</u>
